Equation (1) can be obtained using two definitions for torque. $\tau = \vec{r} \times \vec{F} = -mgl \sin \theta$, where l is the length vector of the pendulum and F_g is the force due to gravity. For now just consider the magnitude of the torque on the pendulum.

Pendulum (mathematics) - Wikipedia

Solves any (supported) kind of ordinary differential equation and system of ordinary differential equations.

Technical Note

Recursive definition. Expanding the Taylor series in Eq. 2 for the first two terms gives =, =for the first two Legendre polynomials. To obtain further terms without resorting to direct expansion of the Taylor series, Eq.
