The recent development of nonlinear time series analysis is primarily due to the efforts to overcome the limitations of linear models such as the autoregressive moving-average models of Box and Jenkins (1976) in real applications. It is also attributed to the development of nonlinear/nonparametric ...

The most direct link between chaos theory and the real world is the analysis of time series from real systems in terms of nonlinear dynamics. Experimental technique and data analysis have seen such dramatic progress that, by now, most fundamental properties of nonlinear dynamical systems have been observed in the laboratory.
